

ASIM — 2027 MASTER'S APPLICATION COMMAND PLAN

■■ Finland + ■■ Luxembourg + ■■ Funding-First / €0-Tuition Strategy

Version: 21 September 2026 | This is our working source-of-truth for the Master's application journey.

1. THE NON-NEGOTIABLE FUNDING RULE

Tuition must be €0 after scholarship. Living support is a bonus. Living can be self-funded if necessary. A 30%, 50% or 70% tuition waiver does not meet the primary target. A programme costing €17k/year is only relevant if a genuine 100% tuition scholarship route exists.

- Primary field: AI / Machine Learning / Computer Science / Data Science or closely related.
- Funding priority: 100% tuition waiver first; living support second.
- Never call a programme 'fully funded' unless the exact award actually covers the tuition/participation cost.
- Funding-first means scholarship mechanics are checked before we invest time in SOPs.

2. CURRENT PHASE

PHASE 1 — Funding-first shortlist + eligibility verification. We are not writing the final SOP or submitting applications yet. We are building the exact map so the application windows become execution rather than research.

- The consolidated grade report shows BE CSE (Artificial Intelligence and Machine Learning), 8 semesters, final CGPA 9.16.
- Visible relevant coursework includes Mathematics I/II/III (Probability & Statistics), Discrete Mathematics, Data Structures, Python Programming, DBMS, Operating Systems, Automata/Languages/Computation, Algorithms, AI, Machine Learning, Advanced ML, Data Science, Computer Networks, Deep Learning and Big Data Analytics.
- The uploaded report is the evidence source for these academic facts; course-content details beyond visible titles must be verified from syllabi before making prerequisite claims.

3. WHAT WE HAVE DECIDED ABOUT FINLAND

Option	Decision now	Funding filter	Next check
Aalto — ML, Data Science & AI	Conditional keep	100% tuition scholarship route is required; living is separate.	2027 scholarship mechanism, GRE, exact prerequisites.
Aalto — Computer Science	Conditional keep	100% tuition scholarship route is required; living is separate.	2027 scholarship mechanism and prerequisite mapping.
Helsinki — Computer Science	Conditional keep	100% tuition waiver route is required; living is separate.	2027 scholarship terms and exact eligibility.
JYU — Artificial Intelligence	Funding-dependent	Current discussed 2027 route does not meet our €0 first-year tuition rule.	Keep only if final rules reveal genuine 100% tuition route.
Oulu — CSE	Funding-dependent	Current discussed scholarship does not automatically make year 1 €0.	Recheck 2027 award; reject if tuition remains payable.
Tampere/TAMK	Separate investigation	Do not confuse Tampere University with TAMK; a specific TAMK Master's route discussed requires post-Bachelor work experience.	Only investigate if a relevant Tampere University programme has a genuine 100% route.
Turku	Funding-dependent	Only keep if exact programme has a 100% tuition route.	Verify 2027 scholarship.

4. WHAT WE HAVE DECIDED ABOUT LUXEMBOURG

Programme	Academic direction	Funding status	Current action
MSc Information & Computer Sciences — AI profile	Strong CS + AI/ML alignment.	Guillaume Dupaix is a major funding target, but is not by itself proof of €0 tuition.	Keep; verify complete 2027 tuition + scholarship equation.
MSc Data Science	Potentially strong; maths needs syllabus verification.	Guillaume Dupaix relevant under current information, but tuition must be checked separately.	Keep conditionally; verify maths + funding.

Guillaume Dupaix: Luxembourg-specific scholarship. We established that it should not automatically be labelled 'fully funded' because scholarship support and tuition treatment must be evaluated separately for the exact programme and 2027 cycle.

5. ERASMUS MUNDUS — PRIORITY #1

Because the hard requirement is €0 tuition, Erasmus Mundus Joint Masters becomes the main funding-first search category. For each exact consortium we will verify tuition/participation costs, scholarship amount, living support, travel, visa/installation, insurance, eligibility, number of scholarships and deadline.

- Search: AI, ML, Data Science, CS, Robotics, Computer Vision, NLP/LLMs, Big Data.
- Do not assume every Erasmus Mundus programme is funded for every applicant.
- Only mark a programme PRIMARY when the exact scholarship route satisfies the €0 tuition rule.

6. MASTER TIMELINE

Period	Phase	Main work
21 Sep–Oct 2026	1	Funding-first shortlist, programme research, eligibility.
Oct–Nov 2026	2	IELTS, document vault, syllabus verification.
Nov–Dec 2026	3	Master SOP narrative, scholarship answers, final documents.
Dec 2026–Jan 2027	4	Finland applications where 100% tuition route exists.
Oct 2026–Jan 2027	4A	Erasmus Mundus applications according to each programme's deadline.
Feb 2027 onward	5	Luxembourg applications after 2027 deadlines are published/verified.
After offers	6	Audit actual award: tuition payable, fees, living support, residence/visa funds.

7. EXACT WORKFLOW

1. Funding-first search: identify genuine 100% tuition routes.
2. Programme fit: AI/ML/CS/Data Science and accepted Bachelor's background.
3. Transcript mapping: maths, programming, DSA, DBMS, OS, networks, AI/ML and other prerequisites.
4. Scholarship mechanics: automatic, same-form, separate, nomination-based, limited or conditional.
5. Cost equation: tuition after award must be €0 for the primary plan.
6. IELTS: working target 7.0+, while meeting every programme's official minimum.
7. Document vault: passport, degree/provisional, transcript, 10th/12th, CMM/PC if needed, CV, LORs, IELTS, research, projects, internship proof.
8. Master SOP: only after shortlist stabilises.
9. Programme-specific SOPs and scholarship essays: evidence-based, no generic copy-paste.
10. Submission tracker: deadline, confirmation, scholarship status, documents.
11. Post-offer audit: accept only after checking the real award and amount payable.

8. DOCUMENT CHECKLIST

- Passport
- 10th certificate
- 12th certificate
- Degree/provisional certificate
- Complete transcript/all semester marksheets
- CMM/PC if required
- IELTS
- Master CV
- 2–3 LORs
- SOP/motivation letter
- Scholarship answers
- Research/publication evidence
- GitHub/project links
- Internship/R&D; proof
- Financial/residence documents when required

9. SOP STRATEGY

We are deliberately **not finalising the SOP yet**. The master narrative will be built after the funding-first shortlist is stable. Planned structure: academic foundation → AI/ML development → research/projects → practical/R&D; experience → why this exact programme → intended learning/research direction → future AI/ML contribution. Every final SOP will be programme-specific and evidence-based.

10. CURRENT STATUS — DONE VS PENDING

- €0 tuition is the hard funding rule.
- Living scholarship is a bonus, not mandatory.
- Finland university scholarship model separated from Luxembourg scholarship.
- Guillaume Dupaix identified as Luxembourg-specific and not automatically counted as a tuition waiver.
- Erasmus Mundus promoted to primary funding-first category.
- Transcript reviewed; final CGPA 9.16 and relevant academic subjects captured.

Still pending:

- Final Erasmus Mundus shortlist
- Final Finland €0-tuition shortlist
- Exact 2027 scholarship terms for every candidate
- Exact Luxembourg tuition + scholarship equation
- Detailed syllabus checks where course titles are insufficient
- Final SOP
- Final scholarship essays
- Applications

11. GITHUB PLAN

Target repository: **Whoisimm/Self-Development-Commitment-**. This PDF is intended as a dated public milestone: plan → preparation → applications → decisions → outcome.

- Suggested filename: **2027-masters-application-master-plan.pdf**
- Suggested commit: **docs: add 2027 masters funding-first application plan**
- Do not commit passport scans, bank statements, private LORs, credentials or other sensitive documents.
- After each major phase, add a dated progress update so the history remains auditable.

12. NEXT ACTION

Next: build the actual funding-first shortlist — Erasmus Mundus first, then Finland 100% tuition routes, then Luxembourg — with exact tuition, scholarship coverage, eligibility and deadlines. **SOP comes after that.**

Source note: this document records our conversation decisions. Current 2027 programme and scholarship rules must be rechecked against official sources immediately before submission.
